BUREAU VERITAS

YOUR PARTNER IN THE NEW MOBILITY RACE

MAKE SURE EACH PHASE OF YOUR PROJECT ACHIEVES QUALITY, SAFETY AND SUSTAINABILITY

Throughout the world, consumers are looking for a **safer** and more **intuitive travel experience**, supported by strong regulations. This demand is driving huge **technological** and **economic change** within the automotive industry. The sector is reinventing itself with new propulsion technologies and mobility concepts.

The ecosystem needs to be **agile** and **adapt quickly** to deliver new solutions for a safer and **greener driving experience.** That means processes all along the value chain that are reliable, proven and replicable wherever the need exists.

That's where Bureau Veritas can bring value to your company by **ensuring safety and compliance throughout the automotive value chain.**

Bureau Veritas' services benefit all players in the automotive value chain, from manufacturers and dealers, to suppliers, governments and, ultimately, consumers.

INDUSTRY CHALLENGES

KEEP AN EYE ON QUALITY, RELIABILITY AND SUSTAINABILITY

Consumer appetite for **customization** is growing, alongside country-specific demands for features.

This brings more complexity as your organization seeks to maintain a **competitive offer worldwide.**

In addition, **digitalization** is impacting vehicle life cycle, while **quality and reliability** remain paramount.

DRIVE YOUR PROJECTS WITH CONFIDENCE ACCORDING TO REGULATIONS

Global automotive expansion means an evolving **distribution network** and shifting production infrastructure.

Internationalization requires more and more **tests and homologations, compliance** with local regulations and sustainable supply chain management to stay ahead of the competition.

You need to take even more care of your **brand image** locally and globally.

ON THE ROAD TO INNOVATION

With Millennials valuing car-sharing, connectivity and enjoyment, companies have to collaborate with various stakeholders to provide **mobility-as-a-service.**

Innovation is also a technical challenge as companies seek to update their skills to compete with industry entrants and **certify new technologies.**

YOUR PROJECTS

DESIGN & CONCEPT VALIDATION

Companies need to **innovate** faster than their competitors.
Ensuring a design meets fit, form and **functional requirements** is vital, as it directly impacts production **performance** and **customer satisfaction.** It is always better to change the design at the outset rather than face a failure or recall later.

PRODUCT CONFORMITY & ASSETS

To remain **competitive,** it is important to implement **efficient processes and controls** at each stage of the **supply chain.** Verifying the **compliance** of products, production lines and infrastructure with the requirements of **applicable standards and technical regulations** at a local level is a prerequisite.

DISTRIBUTION STEPS CHECK

Automotive industry is shifting from a product-centric to a **customer-centric** approach to drive customer loyalty and retention. The automotive industry has undergone substantial distribution channel evolution resulting from **economic, regulatory and technological changes.** Companies have to transform processes and systems that impact sales and services to enable a seamless **customer experience.**

SALES & POST-SALES EFFICIENCY

Customers are more informed and have a clear idea about the product they are looking for. They are also expecting a **quick and easy experience** throughout the **lifecycle** of their car. That means that the **multiple players** involved during the sales and post sales phases need to be **organized and efficient.**
